"Let us help you lead your organisation confidently into the future."

SYNATEQ DELIVERS BETTER BUSINESS AND SERVICE DELIVERY SYSTEMS

Synateq consultants have a wealth of experience in government and organisational business and service delivery systems. Their knowledge of strategic analysis, process and system design, and effective change management and implementation strategies, enables Synateq to successfully bridge the gap between strategic direction and business systems capability.

How well your organisation is equipped to deal with change, growth, service delivery and performance improvement is heavily attributed to your business processes and systems. Our consultants work alongside your organisation in order to create systems and process solutions that are carefully designed to meet your organisation's specific needs and requirements.

For over a decade we have been designing, delivering and developing business systems for government and organisations. And, it is through local insight and a commitment to excellence that we are able to present the best possible solutions and outcomes for our clients.

Student Placement Management System, University of Tasmania

The Student Placement Management System designed for UTAS manages complex information workflows, business rules, preferences and prerequisites to allocate students to work placement programs.

Licensing Information Management Systems

Synateq has built licensing management systems for a range of clients including the Tasmanian Department of Treasury and Finance, Department of Education and Department of Health and Human Services.

Tasmanian Disability Services Information System

The TasDis system centralises data collection about disability support service organisations throughout Tasmania and provides the Department of Health and Human Services with easy reporting capabilities.

SYNATEQ EXPERIENCE

Synateq consulting teams are matched to your needs so they hit the ground running.

Analysis, Strategy and Planning

Solution envisaging, project definition and implementation planning helps you to maximise the value of strategic directions.

Business Process and Service Delivery Improvement

Current and future state process modelling clearly demonstrates the benefits of improvements.

Change Management

Communication and education plans to successfully embed cultural and operational change.

Project Management

Effective management of project scope, risks, issues, financial budgets and stakeholder engagement.

BETTER OUTCOMES

Delivery to Expectations

Cost Effectiveness

Clarity of Understanding

A Quality Solution

OUR CONSULTANTS' REASON FOR BEING IS EFFECTIVE SOLUTION DELIVERY

When it comes to any project, our number one objective is to deliver a successful outcome. Our consultants provide focus, effective communication and transparency throughout programs, working with you to prioritise and co-ordinate resources across projects, manage risks and costs, and strengthen links between projects.

Synateq consultants offer a structured approach to process improvement and change management. Our tried and tested approach allows for the seamless and successful implementation of new systems and processes, as well as the continuing development of staff skills and management of expectations. We are committed to ensuring that every project we undertake reaches its maximum potential, regardless of the size or complexity.

Synateq consultants provide long term improvements to your organisation, ensuring that they deliver not only the capability for change, but also the transfer of knowledge to your organisation to deliver real benefits.

“Synateq’s Project Builder development tools enable us to deliver robust solutions on time, every time.”

CUSTOM BUILT SOFTWARE THAT’S SO ROBUST WE GUARANTEE IT FOR LIFE

Every organisation is different, each with its own inherent values, capabilities and strategic directions. For these reasons, we offer custom software development designed by our expert team as a stand alone project or as an integral part of our consulting solutions. Talk to us about a custom built software solution designed specifically to meet your needs, goals, requirements and budget.

All Synateq applications are robust, easy to use and technically efficient. The combination of our experienced team, best practice methodology, specialised development tools and use of market leading software platforms, ensures minimal risk as well as product delivery that is on time and on budget.

All Synateq custom built applications come with a lifetime guarantee.

Talk to us about:

- Customised business systems
- Automated workflows
- Customer interaction solutions and dynamic online forms
- Service delivery systems
- Asset management information systems
- Information portals using Microsoft® Office SharePoint® Server
- Integrated mobile solutions
- License management systems

INTEGRATED SOFTWARE SOLUTIONS TAILORED FOR BETTER BUSINESS PERFORMANCE MANAGEMENT

Budget and Plan

After talking to many clients struggling to manage data integrity across multiple spreadsheets during planning and budgeting processes, Synateq developed the Plan-Teq software suite.

Plan-Teq is a powerful, user friendly, best practice planning application configured by our consultants to match your environment. It facilitates a controlled planning and budgeting process across all levels of an organisation through one easy interface, and includes flexible models for budgeting, employee modelling, revenue forecasting and capital expenditure management.

Implementation is led by Synateq consultants, who are Certified Practising Accountants with significant experience in planning and business intelligence.

The ability to effectively manage your business performance relies on implementing processes and systems that give you clarity and insight into key efficiency, quality and profit drivers. Synateq can provide an integrated suite of business systems that allow you to move seamlessly between comprehensive business planning, execution, monitoring and feedback.

Execute and Manage

Synateq can tailor the perfect enterprise resource planning (ERP), accounting and business management software tools for the needs of your organisation based on a Greentree business building solution. Greentree is suitable for medium to large organisations that have outgrown their 'off the shelf' accounting packages, but require a comprehensive solution without the financial burden of a full enterprise suite.

Monitor and Feedback

Instant access to key information and the ability to drill down into detail is essential for enabling organisations to seize opportunity.

Synateq consultants have many years of experience in setting up the perfect Business Intelligence (BI) tools to put essential information at your fingertips.

With fast, powerful in-memory business analysis provided through QlikView software, and set-up guided by our experienced team, your organisation will reap the rewards of accurately monitoring performance and informed, evidence based decision making.

With seasoned Certified Practising Accountants (CPAs) in our team, we can help you achieve better business performance management.

PLAN·TEQ™

SYNATEQ IS TAKING WORLD CLASS SOFTWARE PRODUCTS TO MARKET

FIELD-TEQ™

The Field-Teq application helps organisations meet their Occupational Health and Safety requirements in off-site locations. It provides a comprehensive process, risk and compliance management tool for organisations that have staff undertaking off-site or field activities in sub-marine, marine and terrestrial environments.

Using a simple web based interface, automated workflows and a formal approval process, the Field-Teq application enables detailed project planning, systematic risk analysis, qualification of participants, completion of safety and procedural check lists and management of assets and project records.

PLAN-TEQ™

The Plan-Teq software suite facilitates a controlled planning and budgeting process across all levels of an organisation through one easy interface. Plan-Teq is a powerful, user friendly, best practice planning application configured by our consultants to match your environment. Plan-Teq software is designed to take full advantage of your existing IT and developed to be fully integrated with your current operating system.

With Microsoft Excel® as the primary interface, the Plan-Teq software suite includes flexible models for budgeting, employee modeling, revenue forecasting and capital expenditure management.

Synateq is also the driving force behind a number of niche market software products. Where we have identified a clear market need for products, we have used our internal capability to develop world class software solutions.

LOCAL EXPERIENCE ACROSS MARKET SECTORS

- Government
- Agencies
- Community Organisations
- Infrastructure & Utilities
- Manufacturing
- Business and Finance

WE SUPPORT YOU FROM START TO FINISH

From working with your organisation to plan the best possible solution, through to implementation and support, Synateq are with you 100% of the way.
